Registered Green Achiever	29th March 2010
Green Achiever Silver	14th April 2010
Green Achiever Gold Status	2011 / 2012 / 2013 / 2014 / 2015 / 2016 / 2017

The Pavilions Shopping Centre is the hassle-free place to shop in the heart of Waltham Cross. The Pavilions Centre has over 50 shops making it the ideal place for all your everyday shopping. The centre is home to a great mix of high street brands but what makes the Pavilions truly unique is our diverse range of specialist shops that you will not find on every high street.

The Pavilions Shopping Centre comply with all environmental legislation relevant to our business activities and is committed to preventing pollution and reducing our impact on the environment.

Current Good Practice:-

- The engagement with tenants achieved over many years continues to produce results in reduced waste statistics. Waste is segregated at the backdoor enabling savings to be made.
- For any shop refits Pavilions have a pre-meeting and use a Shop Refit Guide to provide guidance on how to reduce and manage waste, particularly hazardous waste, effectively.
- Energy consumption is reduced through numerous mechanisms
    - Lighting in the Mall and car park uses photo sensors resulting in big energy savings.
    - Lighting fittings are being swapped to lower energy LED fitings through an installation programme.
    - ZeroTrace utility monitoring system installed last year has data recording capability to help pinpoint inefficiencies.
- Printers and computer equipment make use of Compwise energy saving technology.
- Pavilions purchases local contractors, uses recycled paper and reduces its raw material consumption by using e-invoicing.

Action Plan Summary - this plan will be reviewed at least on an annual basis.

• This Environmental Policy will be added to the Community Page as part of the promotion of the centre credentials for centre users and current and potential tenants.	End October 2017
• Maintain Duty of Care on waste management and retain current copies of Waste Carrier Licence details for contractors.	On-going
• Gather monthly performance data reports via the ZeroTrace system on consumption of energy and water alongside costs, in order to correlate infrastructure changes made with £, kWh and ltr savings achieved.	End October 2017 & On-going
• Ensure the environmental credentials of the supply chain are reviewed in tendering processes – eg. on the materials used as well as on the company profile, and in areas such as % recycled for new waste contract.	As Required & On-going
• Consider installing oil/water interceptors in the car park drains in order to reduce potential pollution through water emissions.	End November 2017
• Consider possible action that could be taken with the local council or WRAP to promote a circular economy action within Waltham Cross through the Pavilions Centre.	End December 2017
• When plans are more developed and it becomes possible to install planters in and around the centre, then consider planting bee and bug-friendly species.	Spring 2018
